WATER SECURITY CONFERENCE 2016: FROM SOURCE TO SUPPLY

VENUE:

Science and Engineering Research Center (SERC)
USM Engineering Campus, Penang

DATE:

10th - 12th May 2016

Collaboration with:

Introduction

Universiti Sains Malaysia (USM) in collaboration with Universiti Teknologi Malaysia (UTM) is organizing a Water Security Conference 2016: From Source to Supply (WSC'16) on the 10th to 12th May 2016 at the Science and Engineering Centre (SERC), Engineering Campus, USM Penang. This conference is supported by the LRGS grant to expand knowledge on water security.

Water security involves the sustainable use and protection of water systems, protection against water related hazards (pollution), sustainable development of water resources and safeguarding the accessibility, water functions and services for humans and the environment. Three main research projects are conducted by USM to address the issues of water security from source abstraction using riverbank/bed filtration (RBF), treatment of micropollutants in drinking water and assessment of full recovery (FCR) from source to supply. This conference aims to highlight and share knowledge related to water security in Malaysia which cover areas that include but not limited to new sources for drinking water, water treatment, new emerging pollutants and impact of new treatment on social economic cost.

Objective

- To disseminate knowledge in water abstraction and treatment
- To propagate information on the new emerging pollutant and treatment
- To impart knowledge on social, economic, and consumers' perception on portable water supply
- To provide a one stop center for water security research
- To publish papers in index journals
